Key developments moving forward:

- Extension of the primary runway from 8,000 feet to 9,000 feet to better serve airline and military activity
- New parallel taxiway on the south side of the primary runway
- Development of the Southeast Quadrant of the airport with new T-hangars, shelters, tie-downs and self-fueling for general aviation
- Reconfiguration of the Northwest Quadrant of the airport for general aviation to make better use of space and allow for expansion of aeronautical services at the airport
- Development of non-aviation uses of specific airport property in concert with the economic development initiatives for the City

Fort Smith Regional Airport
6700 McKennon Blvd. • Suite 200 • Fort Smith, Arkansas 72903
479.452.7000 • fax 479.452.7008 • www.fortsmithairport.com
The Fort Smith region is taking off and the Fort Smith Regional Airport is both figuratively – and literally – a big part of it. The primary indicators for aviation demand are the number of passengers boarding aircraft (enplanements), the number of based aircraft, and the number of takeoffs and landings (operations). With steady economic growth anticipated in the region and affirmative steps by the airport to encourage aviation use at Fort Smith, the projections are for an average annual increase in these indicators by 3.4% for enplanements, 3.3% for based aircraft and 1.5% for operations.

At the Fort Smith Regional Airport, we understand our important role in the economic development of Fort Smith and the wider region. Whether serving the needs of personal use, or key business and commercial travel, the services provided at the airport help make Fort Smith a more attractive place to live, work, raise a family – or build a company.

The Fort Smith Regional Airport is focused to meet the air transportation and economic development needs of this bi-state region. The demands of commercial, military and general aviation are diverse and uniquely met by this Regional Airport. This one resource enables commerce to flourish and individuals to remain connected throughout the world.

**Key Features:**
- Two runways (longest is 8,000 feet)
- Dual Instrument Landing System
- FAA Control Tower
- Exquisite Airline Terminal
- Full compliment of Aviation Services

**Simply a Great Thing for the Fort Smith Region**
